ENDOCYTOBIOLOGY III[a]

Editors and Conference Organizers
JOHN J. LEE and JEROME F. FREDRICK

CONTENTS

Introductory Remarks. *By* JOHN J. LEE xi

Part I. Status of Cell Symbiosis Theories

An Overview of the Status of Evolutionary Cell Symbiosis Theories. *By* F. J. R. "MAX" TAYLOR 1

The Origin of Eukaryote and Archaebacterial Cells. *By* T. CAVALIER-SMITH 17

The Simultaneous Symbiotic Origin of Mitochondria, Chloroplasts, and Microbodies. *By* T. CAVALIER-SMITH 55

The Evolutionary Significance of the Archaebacteria. *By* W. FORD DOOLITTLE 72

Eukaryotic Traits in Archaebacteria: Could the Eukaryotic Cytoplasm Have Arisen from Archaebacterial Origin? *By* WOLFRAM ZILLIG 78

Are Centrioles Semiautonomous? *By* LELENG P. TO 83

Origins of the Plant Chloroplasts and Mitochondria Based on Comparisons of 5S Ribosomal RNAs. *By* NICHOLAS DELIHAS and GEORGE E. FOX 92

Evolution of Organisms and Organelles as Studied by Comparative Computer and Biochemical Analyses of Ribosomal 5S RNA Structure. *By* VOLKER A. ERDMANN, JÖRN WOLTERS, TOMAS PIELER, MARTIN DIGWEED, THOMAS SPECHT, and NORBERT ULBRICH 103

Structural Diversity of Eukaryotic Small Subunit Ribosomal RNAs: Evolutionary Implications. *By* MITCHELL L. SOGIN and JOHN H. GUNDERSON 125

[a]This volume is the result of a conference entitled Endocytobiology III held from June 10 to June 12, 1986 in New York, N.Y., and sponsored by The New York Academy of Sciences.

Part II. Possible Codescendants of Cell Organelles

Paracoccus as a Free-Living Mitochondrion. *By* PHILIP JOHN..... 140

Cyanelles: From Symbiont to Organelle. *By* HAINFRIED E. A. SCHENK, MANFRED G. BAYER, and DOUGLAS ZOOK..... 151

Phylogenetic and Phenotypic Relationships between the Eukaryotic Nucleocytoplasm and Thermophilic Archaebacteria. *By* DENNIS G. SEARCY..... 168

Photosomes and Scintillons: Intracellular Localization and Control of Luminescent Emissions. *By* J. WOODLAND HASTINGS, JEAN-MARIE BASSOT, and MARIE-THÉRÈSE NICOLAS..... 180

Prokaryotic Origin of Undulipodia: Application of the Panda Principle to the Centriole Enigma. *By* DAVID BERMUDES, LYNN MARGULIS, and GEORGE TZERTZINIS..... 187

Are the Nucleomorphs of Cryptomonads and *Chlorarachnion* the Vestigial Nuclei of Eukaryotic Endosymbionts? *By* MARTHA LUDWIG and SARAH P. GIBBS..... 198

Viroids: Subcellular Location and Structure of Replicative Intermediates. *By* DETLEV RIESNER, PETRA KLAFF, GERHARD STEGER, and ROLF HECKER..... 212

Part III. Coevolution of Associations: A View at the Organismic Level

Predatory Bacteria in Prokaryotic Communities: The Earliest Trophic Relationships. *By* RICARDO GUERRERO, ISABEL ESTEVE, CARLOS PEDRÓS-ALIÓ, and NÚRIA GAJU..... 238

Bacterial Viruses, Prophages, and Plasmids, Reconsidered. *By* SORIN SONEA..... 251

Different Endocytobionts Simultaneously Colonizing Ciliate Cells. *By* HANS-DIETER GÖRTZ..... 261

Initiation and Control of the Bioluminescent Symbiosis between *Photobacterium leiognathi* and Leiognathid Fish. *By* P. V. DUNLAP and M. J. MCFALL-NGAI..... 269

Molecular Interactions in Endosymbiosis between Legume Plants and Nitrogen-Fixing Microbes. *By* DESH PAL S. VERMA and JOHN STANLEY..... 284

Transmission Modes and Evolution of the Parasitism-Mutualism Continuum. *By* PAUL W. EWALD..... 295

Coevolution in Lichens. *By* VERNON AHMADJIAN..... 307

Naturally Occurring and Artificially Established Associations of Ciliates and Algae: Models for Different Steps in the Evolution of Stable Endosymbioses. *By* W. REISSER..... 316

Algal Symbiosis as the Driving Force in the Evolution of Larger Foraminifera. *By* JOHN J. LEE and PAMELA HALLOCK..... 330

Animals with Photosynthetic Symbionts. *By* ROSALIND HINDE..... 348

Control of Translocation in Some Associations between Invertebrates and Algae. *By* ROSALIND HINDE..... 355

Part IV. Coevolution of Symbiont Genome and Plasmone; a View at the Cellular and Molecular Levels

Change of Cellular "Pathogens" into Required Cell Components. *By* KWANG W. JEON..... 359

Compartmentation of Calcium and Energy Metabolic Pathways: Implications for Eukaryote Evolution and Control of Cell Proliferation. *By* J. BEREITER-HAHN..... 372

Eubacterial, Eukaryotic, and Unique Features in the Mitochondrial Genome of *Oenothera*. *By* W. SCHUSTER, R. HIESEL, E. MANNA, W. SCHOBEL, and A. BRENNICKE..... 380

Gene Transfer: Mitochondria to Nucleus. *By* GERD GELLISSEN and GEORG MICHAELIS..... 391

Nuclear Transfer from Parasite to Host: A New Regulatory Mechanism of Parasitism. *By* LYNDA J. GOFF and ANNETTE W. COLEMAN..... 402

Evolution of Eukaryotic Cells via Bridge Algae: The Cyanidia Connection. *By* JOSEPH SECKBACK..... 424

Cyanidiophyceae: Transition Stages in the Evolution of the Glucosyltransferase Isozymes. *By* JEROME F. FREDRICK..... 438

Part V. Model Developments and Behavioral Interactions

Bacterial and Algal Effects on Metamorphosis in the Life Cycle of *Cassiopea andromeda*. *By* M. RAHAT and D. K. HOFMANN..... 449

Cell Division Cycles and Circadian Clocks: Modeling a Metabolic Oscillator in the Algal Flagellate *Euglena*. *By* LELAND N. EDMUNDS, JR., DANIELLE L. LAVAL-MARTIN, and KEN GOTO..... 459

Endocytobiotic Coordination, Intracellular Calcium Signaling, and the Origin of Endogenous Rhythms. *By* FRED KIPPERT..... 476

Endocytobionts and Mitochondria as Determinants of Leafhopper Egg Cell Polarity. *By* WERNER SCHWEMMLER..... 496

Tubulinlike Protein from *Spirochaeta bajacaliforniensis*. *By* D. BERMUDES, S. P. FRACEK, JR., R. A. LAURSEN. L. MARGULIS, R. OBAR, and G. TZERTZINIS..... 515

Closing Remarks

Catalyst. *By* JEROME F. FREDRICK 528

Poster Papers

Evolutionary Differentiation in Gymnodinioid Zooxanthellae. *By* R. J. BLANK 530

Cell Culture Models to Study Symbiosis. *By* PETER M. BRADLEY and CLIFFORD S. DUKE 534

Distribution and Transmission of Cytoplasmic DNA during Multiplication in *Netrium digitus* (Chlorophyceae). *By* MASAHIRO R. ISHIDA, JIN HAMADA, and MASAHIRO SAITO ... 538

An Aphid Endosymbiont Has a Large Genome Rich in Adenine and Thymine. *By* HAJIME ISHIKAWA 541

Dynamics and Host Influence of Methane Production by Microbial Symbionts in a Lower Termite. *By* MONICA J. LEE and ADAM C. MESSER 544

Origins of Eukaryote Sensory Transduction. *By* M. LEVANDOWSKY 546

The Vesicle in the Bacteroid-Containing Cells of Root Nodules Is a Kind of Organelle: A View on the Interrelation between Rhizobium and Legume Plants. *By* LIANG OUYANG 548

The Cyanelle Genome of *Cyanophora paradoxa*: Chloroplast and Cyanobacterial Features. *By* WOLFGANG LÖFFELHARDT, HERMANN MUCKE, HEIMO BREITENEDER, DAVE N. T. ARYEE, CHRISTIAN SEISER, CHRISTINE MICHALOWSKI, MICHAEL KALING, and HANS J. BOHNERT 550

The Role of Light in the Symbiosis between Algae and Hydra. *By* G. MULLER-PARKER and R. L. PARDY 553

Major Acyl Lipids of Cyanelles from *Glaucocystis nostochinearum*. *By* O. TACHEENI SCOTT 555

Nucleotide Sequence of *Cyanophora paradoxa* Cellular and Cyanelle-Associated 5S Ribosomal RNAs. *By* E. S. MAXWELL, J. LIU, and J. M. SHIVELY 559

Chloroplast Retention by Marine Planktonic Ciliates. *By* DIANE K. STOECKER and MARY W. SILVER 562

Plant and Bacterial Cell Wall Deformations in the Functional Part of the Bacterial Leaf Nodule of Spearflower [*Ardisia crispa* (Thunb.) A.DC., Myrsinaceae]. *By* URMAS SUTROP 566

Condensation of Nucleoid Material in Leafhopper Endocytobionts. *By* TOOMAS H. TIIVEL 570

Cytochemical Determination of DNA Content in the Nucleus and Nucleoids of *Cyanidium* and Some Microbial Cells. *By* IKUJIRO FUKUDA and HIDEYUKI NAGASHIMA 575

Structural Homologies in the D-Loop-Containing Region of Vertebrate Mitochondrial DNA. *By* E. SBISÀ, M. ATTIMONELLI, and C. SACCONE 578

Killer Particles in the Macronucleus of *Paramecium caudatum. By* HELMUT J. SCHMIDT and HANS-DIETER GÖRTZ..... 580

Antigenic Properties of Erythrocyte Membrane from a Hypertensive Strain of Rats. *By* M. FERRANDI, S. SALARDI, R. MODICA, and G. BIANCHI..... 584

Index of Contributors..... 589
